

## V3W Firmware Update Notes for 7.1.2.60.27(DHCP) & 7.1.2.60.26

Added temperature measurement switch in Health Questionnaire Mode and Basic QR Code Interface Mode:

- 1) When "Take Temperatures" is not checked, it means that you only need to scan the QR code, temperature measurement is not required.
- 2) When "Take Temperatures" is checked, it means that both the QR code scanning and the temperature measurement are required.
