

V2PRO Firmware Update Notes for 6.1.2.28.91(DHCP) & 6.1.2.28.90

Added temperature measurement switch in Health Questionnaire Mode and Basic QR Code Interface Mode:

- 1) When "Take Temperatures" is not checked, it means that you only need to scan the QR code, temperature measurement is not required.
- 2) When "Take Temperatures" is checked, it means that both the QR code scanning and the temperature measurement are required.
